

TEMP-TAPE® 180°

180° F 82° C

180° F 82° C

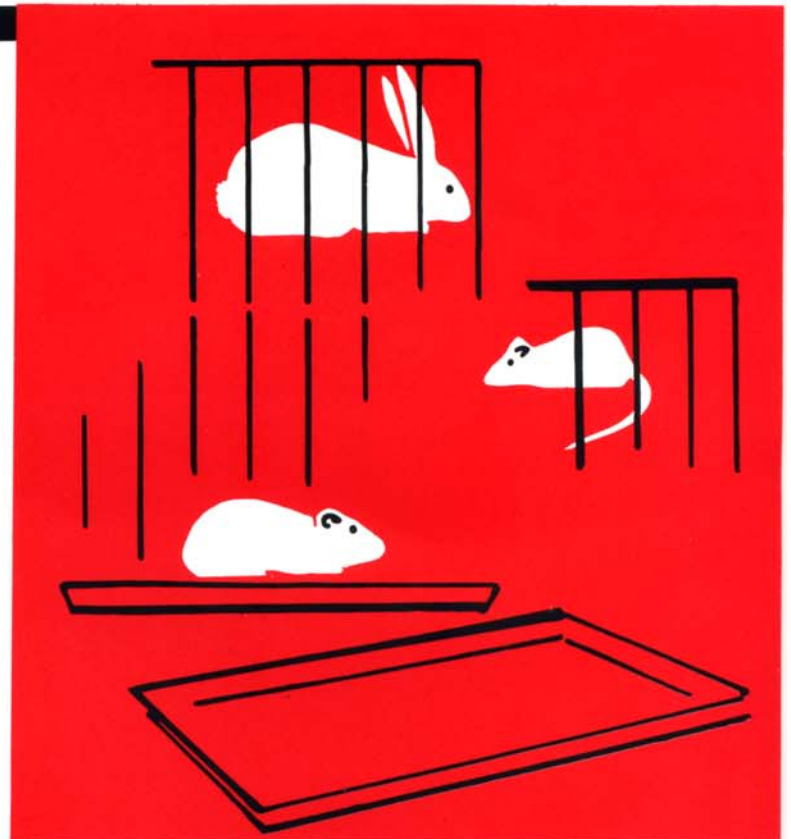

TEMP-TAPE®180° is a nonreversible, self-adhering temperature recording label. It economically and accurately records when the surface temperature of the equipment in the washer has reached 180°F.

Response time is one to three seconds depending upon the contact time with the wash solution, and has an accuracy of ± 1 percent. The rated temperature is printed in large red type in both °F and °C to allow for direct readout at a glance. The color change is sharp, from silver to black.

The exposed TEMP-TAPE®180° may be removed from the surface and easily filed for future reference.

TEMP-TAPE®180° will withstand thermal contact with wash solutions and can be stored indefinitely.
